Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation allows the operation of a materials recycling facility located on Hespin Wood landfill. The site was originally granted a standard rules permit for household, commercial and industrial waste transfer station with treatment, and storage of asbestos, (SR2008No7). An additional waste stream has now been added to the required list of wastes.

The additional waste will be accepted, stored and treated within a building. The throughput has not changed and remains at 75,000 tonnes per annum.

There are no point source emissions to air, land or water except for discharge of clean surface water from roofs or areas of the site, not being used in connection with storage and treatment of waste, to surface waters.

The Environment Management System will be finalised once the facility has been built, and a site specific management system will be put in place to run alongside the general procedures and work instructions of Cumbria Waste Management Ltd.

As a result of this variation the permitted activity is now subject to a bespoke waste permit.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
